PROJECTS

VOICE ASSISTANT Aug 2024
Voice Assistant is a tool leveraging APIs to provide real-time updates on weather, news, and other information through voice commands. It offers hands-free interaction, enhancing daily productivity and accessibility.

PSR ENHANCEMENT OF LUNAR CRATERS Sept 2024
This project uses image processing techniques, such as edge detection and contour analysis, to enhance the visibility of PSRs in lunar crater images captured by Chandrayaan-2. By resizing and filtering the images, it identifies significant surface features, providing detailed measurements to support lunar exploration and research.

KEYLOGGER Oct 2024
Developed a keylogger that captures keystrokes, screenshots, and system information while running stealthily. The tool sends logs via email and includes mechanisms to avoid detection and delete itself to evade Windows security.
